Mark Laszlo

Cloud Architect

mark@ccx.hu • +36304107977
Hungary

I am a seasoned AWS Cloud Architect, specializing in the end-to-end delivery of scalable and innovative cloud solutions on Amazon Web Services. My role as an AWS Community Builder places me at the heart of the AWS community, providing access to cutting-edge technical resources and a network of cloud technology leaders. This engagement fuels my passion for continuous learning and allows me to stay at the forefront of emerging technologies, including a keen focus on the practical applications of Generative and Agentic AI within the AWS landscape.

My academic background, with a Master's degree from Aarhus University and a Bachelor's in Electrical Engineering, complements my extensive hands-on experience. I am a strategic thinker who excels in dynamic environments, consistently driving projects to successful completion. My dedication to professional growth is evidenced by my multiple AWS certifications, which demonstrate a broad and deep expertise across various cloud domains. I am now actively exploring how to leverage AWS services to design and build the next generation of intelligent applications powered by Generative and Agentic AI.

Professional Experience

EUROPEAN PARLIAMENT — December 2023
CLOUD ARCHITECT

- Drive AWS security posture improvements for clients, aiming to increase AWS Security Hub scores.
- Analyze existing AWS environments, identify security gaps, and implement remediation strategies in line with security best practices.

AGCO CORPORATION — October 2022 — December 2023
SENIOR CLOUD ARCHITECT

- Successfully migrated on-premise applications to AWS, optimizing performance and cost-efficiency.
- Spearheaded application migration to Amazon EKS, ensuring seamless containerized deployments in a Kubernetes environment.

WAEG, AN IBM COMPANY — September 2021 — October 2022
AWS ARCHITECT

- Architected a greenfield, containerized application on AWS, designing a fully scalable and resilient solution with seamless Salesforce integration.
- Engineered a highly cost-optimized infrastructure, resulting in a minimal operational run-cost for the new platform.

IAMOPS | DEVOPS FOR STARTUPS — March 2020 — August 2021
SENIOR CLOUD ARCHITECT

- Enable AWS cloud journey, create a business case, make the Cloud dream become reality
- Design and prototype cloud solutions, create solution architecture document covering deep technical aspects of the implementation
- Create a unified strategy for cloud transformation governance, automation, security, implementation and operations
- Maintain project progress and documentation using Jira/Confluence.
- Analyse existing application portfolios, develop next-gen application architecture, transformation and modernisation roadmap
- Conduct cloud solutions architecture review/audit and create review/audit report

TC2 - BUDAPEST, HUNGARY, Budapest
CLOUD ENGINEER
September 2019 — August 2021

- Architect scalable, cloud-based, secure, and extensible solutions to accommodate project needs using applicable AWS infrastructure services
- Consults and makes recommendations on cloud-based application deployments to ensure that they follow best practices in the areas of security, availability, redundancy, cost optimization, and compliance controls.
- Configure and maintain AWS infrastructure, including monitoring of system health and performance, to ensure high levels of performance, availability, and security

VIOSTREAM - SYDNEY, AUSTRALIA, Sydney
TECHNICAL SUPPORT ENGINEER
November 2017 — May 2019

I am driven by improving efficiency and customer service with the help of our international team. Technical skills I've used daily:

- CSS, HTML,
- Terraform, Packer
- SQL, Python
- video encoding/packaging.

IBM BUDAPEST LAB - BUDAPEST, HUNGARY, Budapest
TECHNICAL RESOLUTION MANAGER
September 2016 — October 2017

- Handling live events and critical situations Coordinating arising issues between developers
- Track, monitor and report resolution activities
- Communication between the Customer Success Team and the Engineering Team

Certifications

AWS Certified Solutions Architect – Professional, February 2019 — January 2028

AWS Certified DevOps Engineer – Professional, January 2019 — January 2028

AWS Certified Security – Specialty, June 2023 — June 2026

AWS Certified SysOps Administrator – Associate, January 2022 — January 2028

AWS Certified Solutions Architect – Associate, January 2022 — January 2028

AWS Certified Developer – Associate, January 2022 — January 2028

Oracle Cloud Generative AI Certified - Professional, July 2024

Education

MSc in Engineering – Technology Based Business Development
Aarhus University, Denmark

BSc Electrical Engineering (English Course)
Óbudai Egyetem Kandó Kálmán Villamosmérnöki Kar, Hungary
